## V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. STATEMENT

Novelty (N)	Claims <u>NONE</u>	YES
	Claims <u>1-13</u>	NO
Inventive Step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-13</u>	NO
Industrial Applicability (IA)	Claims <u>1-13</u>	YES
	Claims <u>NONE</u>	NO

### 2. CITATIONS AND EXPLANATIONS

Claims 1-13 lack novelty under PCT Article 33(2) as being anticipated by Fischer.

Fischer disclosed the use of defined authority definition for processes and resources running on a computer system within a networking environment. See, inter alia, Column 2, Lines 16-33. Granularity of control was performed at the process level, capable of involving multiple specifications. See, inter alia, Column 2, Lines 40-43, and Column 9, Lines 9-18. The system was further capable of utilizing "objects", which were inherently list(s) of programs/processes/functional segments/etc., as well as using "control block files" to monitor and "link" individual processes, control/monitor launch event(s) and user input/interaction, and security. See, inter alia, Column 2, Lines 6-15, Column 5, Lines 8-50, Column 9, Line 32 through Column 10, Line 30, Column 11, Line 65 through Column 12, Line 23, and Column 14, Lines 4-20. The implementation of this functionality in a purely networking environment, as dictated in some of the dependent claims, would require minimal modification, and was well within the scope of knowledge of the ordinary routineer at the time of invention.
